

2011 TORONTO HANDS ON COURSE

# Hands-On Course

## *Esthetic and Occlusion Guidelines*

Presented by Dr. Terry T. Tanaka, D.D.S.

**THIS COURSE IS CURRENTLY SOLD OUT WITH A WAIT LIST ONLY. CONTACT DAVID TO CHECK AVAILABILITY - [info@cardp.ca](mailto:info@cardp.ca)**

- September 22nd, 9:00 am – 5:00 pm, Fairmont Royal York Hotel
- Cost: \$445.00 Per Person – Space is Limited
- 7 CE credits to be issued
- Breaks and a one hour lunch to be provided

**Synopsis:** Dr Tanaka has published numerous articles and is widely recognized as a research anatomist and for his teaching of advanced restorative procedures. He is highly sought after as a speaker throughout the world, and is known for his exciting presentations and outstanding clinical skills. His educational videotapes on TM Dysfunction, Anatomy and Implants are used in over 80 medical and dental schools and surgery programs throughout the world.

CONTINUING EDUCATION RECOGNITION PROGRAM

## Esthetics and Occlusion - *“you can’t have one without the other”*

The current “trend” towards “esthetic procedures” has produced unexpected results of porcelain fracture, marginal breakdown and leakage, and wear of the opposing teeth.

*Why is this happening?*

*How can these problems be prevented?*

*What “guidelines” are available?*

*Why do I need to know these guidelines?*

All of these questions and many more will be answered in this New Seminar full of exciting tips “Ready to use Monday Morning”.

Important restorative and prosthodontic guidelines will be presented in lecture and laboratory “workshops” that will teach each participant how to apply the guidelines to actual clinical patient problems. Treatment plans will then be discussed in order to allow the participant to consider other possibilities.

***Course Objectives:***

*To gather, organize, interpret and apply important clinical information for comprehensive treatment planning*

- *To provide the most “comprehensive” treatment for the Patient*
- *To Avoid esthetic and functional failures*
- *To teach Interdisciplinary treatment planning guidelines*

***You Will Learn:***

- *How to perform a “Comprehensive Examination” and the “Functional Analysis”.*
- *Why a clear understanding of “masticatory function” is vital when treatment planning esthetic restorations.*
- *Guidelines for the “management of occlusal forces”. “Who clenches with the greatest forces and when”.*
- *How the above information determines your choice of restorative materials?*
- *What is your role in interacting with specialists. What should you know as the referring dentist?*
- *When is it possible to treat “one tooth at a time” and when mounted cases are necessary?*
- *Guidelines for determining anterior tooth length in patients with worn incisors.*
- *How anterior tooth wear and the Curve of Spee are related in esthetic procedures.*
- *Guidelines for altering the Occlusal Vertical Dimension: when and how?*

*\*Bring your Cameras and you will learn to make Digital “Case Presentations”.*

*Participants will receive the “Treatment Planning” DVD by Dr. Tanaka, a 4 hour, \$300.00 value, and a PowerPoint CD of the patient cases presented at the course.*

**Dr. Terry T. Tanaka, D.D.S.**

**Clinical Professor, Advanced Education in Prosthodontics  
University of Southern California School of Dentistry**

Dr. Terry Tanaka maintains a private practice in Chula Vista, California and is a Clinical Professor at the University of Southern California, School of Dentistry in Graduate Prosthodontics and Endodontics. He started the “Restorative and Prosthodontic Study Groups” held at the UCSD School of Medicine, San Diego in 1982 and has other study groups in Hawaii and abroad.

He is an anatomist and researcher and has published numerous articles. He is especially well known for his educational library of CD's and DVD's on TMJ Anatomy and Advanced Restorative Procedures that are used in over 80 dental schools and surgery programs through out the world.

In 2006, the Academy of General Dentistry's Dr. Thaddeus V. Weclaw Award was presented to him at the AGD Annual Meeting. "for his outstanding contributions to the art and science of dentistry, and / or whose contributions have enhanced those goals and principles, and ideas for which the Academy Stands.

He conducts grant supported anatomical research and is a Diplomat, American Board of Orofacial Pain and a Master in the Academy of General Dentistry. He is a member of the American Academy of Restorative Dentistry, The Pacific Coast Society of Prosthodontists and holds fellowships in the American College of Dentists, International College of Dentists, Academy of Dentistry International, among others.

***From: Dr. Jeffery Okeson:***

"I have presented many Courses with Dr. Tanaka, and I know first hand of the excellent information he offers in the area of fixed prosthodontics. Terry provides the participants with insights that take the mystery out of restoring the dentition.

He knows about TMD and how it may relate to restorative procedures. His anatomic dissections are the best in the World. Don't miss the chance from a Master who has successfully done it for Years."
